**CareClip**

## **Provides Confidence and Independence To Users and Invaluable Peace Of Mind To Family and Carers**

Careclip is a revolutionary new product designed to assist with independent living, lone worker protection, farmers working alone with machinery or animals and anybody that needs the comfort and security of having 24/7 contact and protection.

It can determine the exact location of the wearer at any time, it can report on the users activity level, a key factor in determining health and wellbeing of older users living on their own.

It has built in panic button with two way voice, GPS tracking and the most advanced fall detection in the world.

**Professionally  
monitored 24/7  
and/or  
Easily monitored from  
home On PC, Phone  
or Tablet**

# homesafe CareClip

## APPLICATIONS

### Independent Living

Be truly independent in your own home with the comfort and security of knowing that family and loved ones are always on hand in an emergency. It is especially invaluable for dementia patients and their families

### Farming Community

Every year we hear of tragic accidents on the farm due to machinery, animals or even slurry tanks. Most of these wouldn't have been fatal if the victim had some way of summoning help and careclip provides immediate warnings and pin-point location for family, neighbours or the emergency services

### Rural Isolation

Careclip provides invaluable peace of mind and also provides a vital lifeline for people living alone or remotely who are fearful of intrusion or attack.

### Lone Workers

Whether you work in the public or private sector there is a Health & Safety industry standard that requires your employer to provide for your safety and wellbeing. Careclip can be tailored to suit any requirements

## FEATURES
